

**Do you know how Hunter and Uffda search for lost kids?
Use the answers in front of Hunter to fill in the blanks.**

Hunter is a search and rescue dog.

Hunter uses his eyes, ears and nose to find you if you get lost.

Sometimes Hunter's nose is up in the air when he is searching for someone.

Sometimes Uffda's nose is to the ground when she is trailing a lost person.

At night, Hunter wears a bright light to see in the dark.

Hunter gives an alert to his handler to say he found someone.

Hunter's alert might be a bark alert.

If you get lost, it's important to sit and stay where you are until help comes.

As a trailing dog, Uffda smells for your shed skin cells with her nose.

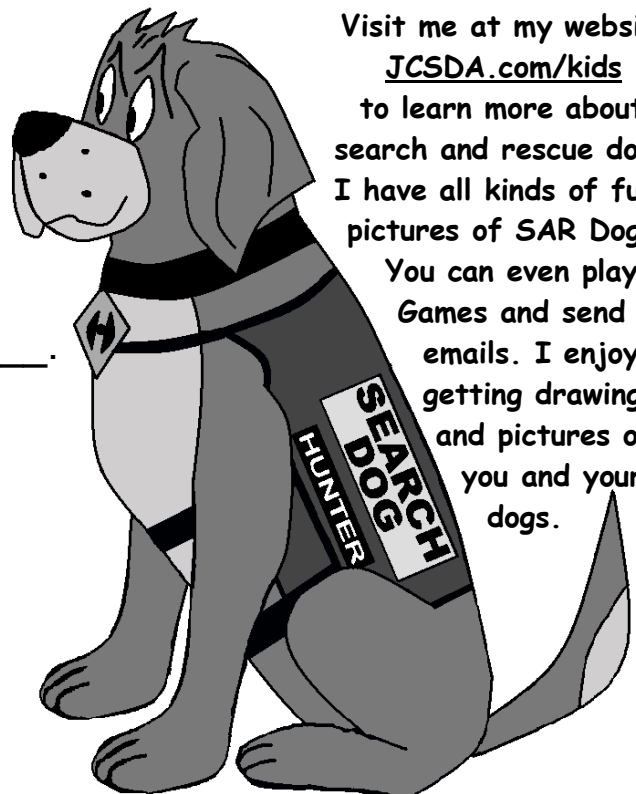

Call out for help so SAR dogs and handlers can hear you.

On a search, Hunter wears an orange safety vest.

SAR dogs are your friend.

ANSWERS

air	handler	rescue
bark	help	search
ears	Hunter	sit
eyes	light	stay
friend	nose	trailing
ground	orange	up

Visit me at my website JCSDA.com/kids to learn more about search and rescue dogs! I have all kinds of fun pictures of SAR Dogs. You can even play Games and send me emails. I enjoy getting drawings and pictures of you and your dogs.
